

The Merchants

Strength points and all the articles displayed here can be purchased for **2 gold each** on the spaces with the merchant symbol (but not when just passing through).

Wineskin:

When a hero chooses the **move action**, he can use **each side** of the wineskin token to move **1 space** without having to move his time marker on the time track. After the initial use, the token is flipped to show its half-full side. After the second use, it is returned to the equipment board.

Shield:

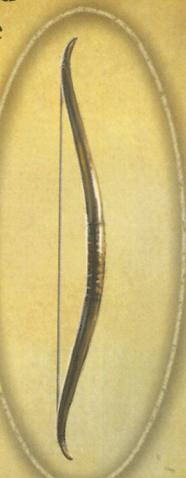

Each side of the shield can be used **once** to either (a) prevent the loss of a hero's willpower points after a battle round, or (b) fend off a negative event card for the group of heroes. After the first use of the undamaged shield, the token is flipped over to show its damaged side. After the second use, it is returned to the equipment board.

Falcon:

This enables **two heroes** to **trade** any quantity of **small articles, gold, or gemstones**, even if they are not standing on the same space. It can only be used **once per day**. After use, the token is flipped to its back side, and then flipped back to its front side again at sunrise.

Equipment Board

Bow:

A hero with a bow can attack a creature on an **adjacent space**. He **must roll his dice one at a time** and decide when to stop rolling. Only the last roll counts.

Helm:

Identical dice values are totaled up in battle with the help of the helm.

Telescope:

A hero may **uncover** all tokens on **adjacent spaces** (but not when just passing through). This does not activate them, however.

The Witch

A hero can only buy the witch's magic potion when he is standing **on the same space as the witch** (but not when just passing through).

The Witch's Brew:

Each side of the token can **double** the value of **one die** in battle. The hero must decide immediately after rolling whether he wants to use the token.

Costs for the brew:

(depends on the number of heroes)

= 3 Gold

= 4 Gold

= 5 Gold

The **archer** always pays **1 gold less** for the brew token.
